PROJECTS

FORM VALIDATION, April 2024 - April 2024

- Developed a robust form validation system using HTML, CSS, and JavaScript, ensuring accurate and secure data input on web forms. This project highlights my ability to create intuitive, user-friendly forms with real-time validation feedback, enhancing the overall user experience and data integrity.

front end design for sleepsnc device project, March 2024 - April 2024

- Developed a front-end web page for the SleepSync device, a cutting-edge tool designed to improve sleep quality through advanced technology. This project showcases my proficiency in HTML, CSS, and JavaScript to create a visually appealing, informative, and user-friendly website that effectively communicates the benefits and features of the SleepSync device.

Custom store webpage front-end design, February 2024 - March 2024

- Designed and developed a custom web page front end using HTML, CSS, and JavaScript, showcasing advanced skills in creating visually appealing, responsive, and interactive user interfaces. This project emphasizes my ability to translate design concepts into functional web pages, ensuring a seamless user experience across various devices and browsers.

stone paper scissor game, February 2024 - February 2024

- Developed an interactive Rock-Paper-Scissors game using HTML, CSS, and JavaScript. This project demonstrates a solid understanding of front-end web development technologies and principles, including responsive design, dynamic user interactions, and game logic implementation.
